Catching up here on our latest Titans of the month. Please join me in congratulating our latest two winners - Vui Nguyen and Malcolm Hollingsworth.

Vui Nguyen

Vui is a very active Titan in the Denver, Colorado area with nearly 15 years of experience as a software developer. We recently highlighted a post by her in our [developer blog](#). She's being recognized for her tireless efforts helping organize the Boulder / Denver meetup group. With her help, the group held 10 very successful meetups and attended two hackathons (where they built Titanium apps, naturally) last year.

Malcolm Hollingsworth

Malcolm hails from Nottingham, UK, has over 20 of experience in the computer industry (software and hardware) and is another very active, dedicated member of the community. He's also a relatively new Titan and just moved up to #2 on the Q&A board of "Top Experts". He is being recognized for his tremendous efforts helping the community and answering their endless flow of questions.

Congratulations Vui and Malcolm and a huge thank you for helping support the Titanium community!
